Borosilicate glass Tubing and Rod is manufactured in standard 1500mm Lengths

Glass Solutions provides a full cutting and finishing service for all tubing sizes

Tube cutting charges include refinishing of the ends and annealing.

Set up charge £7.00 plus the following amounts per tube.

Tubes up to 10mm diameter £1.50
 Tubes 11 – 20mm diameter £2.00
 Tubes 22 – 30mm diameter £2.50
 Tubes 32 – 40mm diameter £3.00
 Tubes 42 – 50mm diameter £3.50
 Tubes 52 – 58mm diameter £4.00
 Tubes 60 – 75mm diameter £5.00
 Tubes 80 – 95mm diameter £7.00
 Tubes 100 – 110mm diameter £8.00
 Tubes 115 – 130mm diameter £10.00
 Tubes 135 – 150 mm diameter £12.00

Glass annealing is a vital post manufacturing process that removes residual strain from the glass caused by heating. This effect is further magnified when items have varying thickness, multiple jackets or complex seals.

Items which are not annealed may be prone to cracking or prove weaker than expected when in service.

Glass Solutions anneals all glass components after working.

A typical annealing process would be to heat the whole piece in a kiln to around 565°C and then cool at a controlled rate to room temperature over 6 - 8 hours
